Step by step instructions for using the Mass Grade Entry tool on the Mid-Term Grade Entry page.

1. Navigate to the Mid-Term Grade Entry page for the Term and CRN of the course to which grades will be entered.

2. Navigate to the Mass Grade Entry tool at the bottom of the page.

Instructions for using Mass Grade Entry:

1. Replace the sample data in the text area within the blue box below with the list of UNISS and grades, in the designated format, for all students appearing on this page that require a grade and press Load Grades.
2. Students with grades previously entered by any method whereby a grade can still be selected will have those grades overwritten with the data provided in the text area.
3. Do not include any students that are not gradable or where a grade cannot be selected. Grades existing in the text area for these students will cause an error in processing.
4. For students having multiple pages of students to grade, the full UNISS Grade list can be pasted into the text area of the blue box of each page of displayed students. Unmatched UNISS/Grade pairs will be ignored from processing.
5. If errors are returned to the process, you must address each error within the text area and press Load Grades again. No grades will be loaded to the page until all returned errors have been addressed.
6. After all grades have been loaded to the page, review the grades for accuracy and any special grading situations (e.g. Honors Credit/Learning Agreement).
7. Press the Submit button to save the grades.

** Error is a list of possible errors returned by the Mass Grade Entry tool and the actions to take for each error:

- No grade found for UNISS - Enter the designated UNISS/Grade combination in the source spreadsheet or text file, replace the data in the text area with the updated data set and press Load Grades.
- Duplicate entry for UNISS at line - Remove the duplicate or incorrect UNISS/Grade entry row from the text area and press Load Grades.
- UNISS has a registration status that is Not Gradable or the student has already received a grade that cannot be changed. Remove the designated UNISS/Grade entry row from the text area and press Load Grades.
- Grade Data must have either commas or tabs (but not both) - the defender option used for the first row of data must be used for the entire list.
- Drop down selection does not include 'X' - Feed incorrect grade in text area and replace with a proper grade.
Mass Grade Entry Tool Instructions – Faculty Self-Service

3. Copy a list of UINs and Grades for the CRN from an external source. Paste that data into the text area in the blue shaded box completely replacing all sample data. It is recommended that you use your preferred spreadsheet or text editor for ease of copy and paste into the text area.

The order of students appearing in the text area is not important so long as ALL students requiring a grade displayed on the Mid-Term Grade Entry page appear in the text area. For classes with multiple pages of students, the entire roster of grades can be pasted into the text area on each page. Unmatched UINs will be ignored from processing.

Using Excel Spreadsheet:

Using Notepad text editor:
4. Press **Load Grades**. Address any errors returned and press **Load Grades** again until all errors have been resolved. For example, if an error is returned that a UIN has no settable grade (typically because the student dropped the section), remove the UIN/Grade data from the text area and press **Load Grades** again.

Sample error message:

```
The page at https://ui2webqa1.admin.uillin...

! UIN 711111117 has no settable grade

OK
```

Highlight the entire erroneous record:  Delete that record from the list:

5. Grades are populated in the Grade column according to the values. Navigate back through the page to ensure the grades loaded correctly.

[Submit] [Reset]

7. For classes with multiple pages of students to grade, repeat Steps 2-6 until all grades have been submitted.

8. To grade another section, navigate to the bottom of the Mid-Term Grade Entry page and choose **Select a CRN.** This will allow you to select another gradable CRN for the same term to which you are assigned. Repeat previous steps.
