

Hybrid Delivery: Distributed Attendance

- For those using distributed attendance, you will **not** need to create separate CRNs to differentiate individualized student meeting patterns.
- The meeting pattern is up to the instructor to determine but the total number of students (plus any additional TAs or staff attending) cannot exceed the room capacity.
- To help students, you must include the following in SSATEXT:

“This section will have distributed classroom attendance with supplemental instruction. You will receive an email from our department with specific attendance directives.”
