

Set Reserved Seats Rules

Reserved Seats Tab

Reserved Seating can be difficult to manage. Review the following section carefully before entering any Reserved Seat criteria.

- Once students are enrolled for the section, you cannot adjust reserve seating rules; you can only adjust enrollment maximum.
- The Reserved Maximum on the first rule will need to be adjusted after creating or deleting reserved seating rules.
- Clicking on the Delete Reserved Seats icon will delete ALL Reserved Seats rules. Once a set of rules has been saved only the Reserved Maximum can be adjusted.
- Verify the accuracy of the Enrollment Maximum number on the Enrollment Details tab after Reserved Seats rules have been created or deleted.

1. Access the Section Enrollment Details tab
SASECT | Section Enrollment Information | Reserved Seats tab

The first set of rules cannot be modified except for the **Reserved Maximum** value. The reserved Maximum will default from the Maximum field on the Enrollment Details tab. This number equals the total number of **unreserved seats** and must be adjusted as reserved seats are added.

One or more criteria may be utilized when reserving seats (see the Reserved Seats Tab Definitions).

However, if multiple criteria exist on a single set of rules, the student must meet ALL reserve seat criteria for that set in order to enroll in one of the reserved seats.

3. Enter reserved seats criteria by utilizing the ellipsis to make the appropriate selection(s).
4. Enter the number of seats to be reserved in the Reserved Maximum field for that set of rules.
5. If you Check the Overflow checkbox in each rule. This allows students who meet the reserved seats criteria to register for available non-reserved seats once the reserved seats in that rule are filled.

Overflow	Reserved Maximum *	Reserved Actual	Reserved Remaining	Waitlist Maximum *	Waitlist Actual	Waitlist Remaining
<input type="checkbox"/>	25	5	20	0	0	0
<input checked="" type="checkbox"/>	10	0	0	0	0	0

NOTE: The Overflow checkbox can be utilized at any point in time, even if enrollment exists in the section. It is possible after enrollment but not advisable.

Question – If the Overflow checkbox is not checked and reserved seating maximum has been reached for a certain population, what override do you give the student?

Example: You have a reserved seating rule for juniors only and you want to add an additional junior to the section.

Answer – The student will need a capacity override.

6. To add additional set of rules, repeat steps 2-5.
7. In the first set of rules, the Reserved Maximum that defaulted from the Maximum field on the Enrollment Details tab must be reduced by the total number of reserved seats established in each rule.

Enter the corrected number of unreserved seats, and tab to view the adjusted Maximum value in the Total Reserved field. (e.g., total seats – reserved seats = total unreserved seats) (e.g., 25 – 10 = 15).
